DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I in the reply filed on 10/22/07 is acknowledged. The traversal is on the ground(s) that the method shares the structure of group II, however the examiner mentioned that the apparatus of group II does not require the method of group I.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 18-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group II, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/22/07.

Specification

3. The abstract of the disclosure is objected to because line 1 recites the phrase "is disclosed" which is implied and should be removed. Correction is required. See MPEP § 608.01(b).

Drawings

4. The drawings are objected to because figure 3 appears to be in French.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version

Application/Control Number: 10/521,089 Page 3

Art Unit: 3618

of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

5. Claim 17 is objected to because of the following informalities: Claim 17 recites "U1" and U2" which were introduced in claim 15. For these reasons claim 15 has been assumed to depend upon claim 15. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/521,089 Page 4

Art Unit: 3618

7. Claims 11 and 22 are rejected under 35 U.S.C. 102(b) as being anticipating by Yamaguchi et al. (US 5,823,281 A).

8. Yamaguchi et al. discloses a hybrid vehicle comprising wheels, an engine 11, a motor 25, a super capacitor or battery 19, wherein said engine shuts off and said motor is able to supply the power at lower speeds, as shown in figures 14-16.

Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al., as applied to claim 11 above.

Yamaguchi et al. does not explicitly disclose at what speeds the motor is used to power the vehicle. The exact speed is not viewed as critical to the invention and unless the specific speed produces an unexpected result, little patentable weight will be given to the specific speed that the motor powers the vehicle alone and therefore it would have been obvious to one having ordinary skill in the art at the time of the invention to have cut the engine of the hybrid vehicle of Yamaguchi et al. at 20, 30 mph, or any other speed in order to save on emissions from burning fuel in the engine.

11. Claim 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al., as applied to claim 11 above, and further in view of Downer et al. (US 6,608,396 B2).

Yamaguchi et al. does not disclose a semiconductor for controlling voltage of the motor. Downer et al. does disclose a semiconductor 1 for controlling the voltage of the motor 18, as shown in figure 1. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the vehicle of Yamaguchi et al. with the semiconductor of Downer et al. in order control the voltage supplied to the motor.

Allowable Subject Matter

- 12. Claims 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 13. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey J. Restifo whose telephone number is (571) 272-6697. The examiner can normally be reached on M-F 10-7.

Application/Control Number: 10/521,089 Page 6

Art Unit: 3618

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Ellis can be reached on (571) 272-6914. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
